## Employer branding: the cornerstone of recruiting.

Good employees are a company's most valuable resource and crucial to its future. Well-trained specialists are becoming increasingly important in times of skilled labour shortages. This is why it's all the more important for companies to position themselves with their own employer branding so they stand out from the crowd and have the edge when it comes to recruitment.

What's the best way to go about it? Authenticity is your top priority here. You need to clearly identify what the company stands for and which career paths are on offer. An Employer Branding Profile on XING and kununu offers perfect communication opportunities on the two largest German-speaking career platforms. XING provides the stage for this, while kununu provides independent and genuine employer ratings which enhance a company's trustworthiness.
